Type: Co2 Laser

Samples

Features of the Machine

Industrial laser engraving is rapidly growing industry in the world. Particularly because there is virtually no limit to the number of materials that can engraved whether you are using metal or non-metal. The operation is simple, lifelong maintenance – free, and the failure rate of the optical fiber marking is low.

ETCHON CLM207, is an Export series Fly-Mark type Co2 laser marking machine with 30W Laser source and can be upgraded to 40W and 60W as per the requirement.

Co2 Non-metal laser marking, and engraving machine is a gas laser machine whose frequency band wavelength of infrared light is 1060um and widely used for marking and engraving on Non-metals.

Broadly used to mark letters, figures, graphics or auto-coding, serial nos., batch nos., barcodes, 2D codes, etc.

This model can be integrated with conveyor and can be used with encoder and sensor.

This model can be fit in production or assembly line whereas it is equipped with split type controller and laser beam is mounted on column of movable trolley platform.

Precise scanning system- High speed scanning system has been used in the system to get high speed, high precision, and stable performance. The laser head is sealed so as to prevent the optical chamber from Contamination.

Precision Field Mirror Stable Performance: Good light perception, good beam quality, improve the edge of the light beam incident on the detector's ability, excellent focalization performance and low loss.

Professional Laser marking software with a user-friendly interface and the controls that allows the connection to multiple laser systems with One Computer or with an option of standalone system that is with inbuilt processor, need to attach screen, keyboard and mouse.

Dust and Oil resistant IP65 Switches and Connectors are used

Column with Manual up and down up to 1000mm where 900 mm is workable travel.

Adopt air cooling method, without any consumables. Built-in air-cooling system.

Laser Machine Delivery Package

- Separate Controller Box (Located on Base of Column)
- 900 mm Column with manual hand wheel for up and down laser beam motion
- Laser beam isolator mounted on the column beam
- 8" Fly Mark Standalone Touch Screen LCD (Software Inbuilt)
- Foot Switch.
- Power Data Cable.
- Driver CD with e-Manual
- Desktop PC Set or 10" Inbuilt Software Touch screen with wireless keyboard and mouse (EzCAD Main Board)

Packaging Details

- Machine Actual Size (L*B*H) cm:
- Machine Actual Weight (kg):
- Box Packaging Size (L*B*H):
- Gross Weight (kg): 150.00

Laser Specifications	
Model	: EtchON CLM207
Type of Model	: Fly-Mark type Co2 Laser
Standard Marking Area	: 110 mm x 110 mm (Optional 150x150, 200 x200, 250x250, 300x300)
Laser Source	: DAVI/SPT
Nominal Average Output Power	: 30W (Optional 40W/60W)
Central Emission Wavelength	: 1060-1070 nm
Repetition Frequency	: 20-80 kHz
Marking Style	: 2D/3D
Marking Linear Depth	: <3 mm
Min Spot Diameter	: 0.02 mm
Min Character Size	: 0.8 mm
Repetition accuracy	: ±0.001 mm
Max Linear Marking Speed	: 0-7000 mm/s
Electrical Requirement	: AC220 ± 10%, 50Hz, 10 Amp
Cooling Method	: Air Cooled
Operational Temperature Range	: 10-40 ± °C
Continuous Working Time	: 12 Hours

Laser Machine Spares	
Parts	Make / Specification
Laser Source	DAVI/SPT
Galvo Head	EMC/Sino-Galvo
Galvo Lens (F-Theta Lens)	Imported Germany JGS1, ZnSe
Control System / Software	EZCAD Lite (PC based or Standalone Touch screen)
Red Light Focus	Inbuilt in Source / Separate Combiner
Red Light Indicator	Inbuilt in Galvo Head
Column Type	Manual up and down 500mm
Switches / Control Buttons	IP65 Switches
Laser Power Supply	All in one / Hengfu
Scan Head Power Supply	All in One / Hengfu
Control Card Power Supply	All in One / Meanwell
Computer System	Desktop PC Set or 10" Inbuilt Software Touch screen with wireless keyboard and mouse (EzCAD Main Board)

Software Features: EZCAD (PC based & Touch Screen)

• True Type / Single Stroke Fonts	• Elliptical Fonts
• Fixed Data (Text) Marking Automatic Serial Numbers	• Marking Automatic Serial Numbers
• Barcodes / QR Code / Data Matrix 2D Code	• Logo / Graphics /Text
• Photo Quality Images – JPG /TIF /GIF	• CAD Files
• Auto Shift / Auto Date Marking /Auto Time Marking	• TCP/IP communication**
• Serial Communication PLC Support**	• Data Input from external file for marking
• Supports SQL database	• Supports Rotary Marking
• Mark on Fly high speed marking**	• Stable Software
• Powerful IO control function	• Supports multiple boards controller by one PC

**** Upgrade in main board required**

Application Material

• Paper	• Wood	• Leather
• Cloth	• Plexiglass epoxy	• Acrylic
• Plastic Bottle	• Unsaturated polyester	• Many more Non-metals

Fiber Laser Machine Upgrade Accessories

*Upgrade Enclosures Body for EtchON 401D Optional

* Upgrade of Source for all models Optional

*Upgrade of Working Area

Manufacturers of Fiber, Co2 & UV Laser Markers, Dot Pin Markers, Fiber Laser Welding Machine, Metal Etching Machines and allied customised automations.

Why to Choose EtchON Machines?

- EtchON Marks Control, we are specialised in manufacturing and integration of types of marking systems and its having manufacturing base at Aurangabad, Maharashtra
- Our products are not only Co2 Laser Engraving Machines, but Fiber Laser Marking Machine, UV laser Marking Machine, Dot pin Marking Machine, Electro-Chemical Metal Etching Machine and its allied automations. We have installed more then 3000 machines in India and exported our products to around 60 countries.
- We provide innovate technological solutions to a wide range of customers in the fields of marking and engraving processes with the help of our team of qualified experts in mechanics, automation and instrumentation systems.
- We are highly experienced in the industry, and the sole goal of our experience staff is to identify challenges in order to offer clients innovative solutions that will yield substantial saving and improve their productivity.
- With the help of our product you can increase your efficiency by introducing a strategic production unit within your companies or by designing an overall plan to improve productivity.
- By working closely with clients' existing staff, we are able to implement solutions to meet specific needs and make a positive impact on production and quality.
- Our mission is to work alongside clients to develop efficient and affordable solutions to meet the most stringent requirements, constantly striving to keep our knowledge up to date in a world where technology is always evolving.
- We are the member of FIEO (Federation of Indian Export Organisations), EEPC (Engineering Export Promotion Council of India) and MASSIA (Manufacturing Association of Small Scale Industries Aurangabad) and feathered with Industry Excellence Award, Iconic Brand of the Year, Best Pavilion ITF Bangkok, Iconic Brand of the Year, Best Employer Award, Best MSME and Innovative Business Award.
